Introduction

This document is a Message Implementation Guideline (MIG) for an EDI Business Message (EBM) used in Infor's enterprise application, M3. It defines in detail the collaboration logic between an EDI message specification and the M3 system. This logic is implemented in an EBM, which is a component in the M3 EDI solution.

The MIG supplied by Infor is usually based on a standard MIG from an EDI implementation standardization organization such as EANCOM, Odette or VICS, and is a subset of the standard MIG, based on the business functionality in M3.

This document consists of two major sections: Elements Used and Element Documentation. The section Elements Used provides an overall view of all EDI elements used in this MIG. The section Element Documentation provides detailed specifications of each and every group, segment, composite and element implemented in the EBM. The element information is presented in the order in which the elements are defined in the standard EDI message.

Elements Used

This section contains a summary of all elements used in this message application, that is, the elements that have documentation attached. Group number, segment name, composite name (if applicable), element name and description are provided for these elements. The elements are listed in message structure order.

Group	Segment	Composite /Element	Element	Description
0 M 1				
	BSN M 1			BSN - Beginning Segment for Ship Notice
			0337 M	Time
			0353 M	Transaction Set Purpose Code
			0373 M	Date
			0396 M	Shipment Identification
			1005 C	Hierarchical Structure Code
	CTT C 1			CTT - Transaction Totals
			0354 M	Number of Line Items
	ST M 1			ST - Transaction Set Header
			0143 M	Transaction Set Identifier Code
			0329 M	Transaction Set Control Number
1 C 200000				Loop Id HL
	DTM C 10			DTM - Date/Time Reference
			0337 C	Time
			0373 C	Date
			0374 M	Date/Time Qualifier
			0623 C	Time Code
	FOB C 1			FOB - F.O.B. Related Instructions
			0146 M	Shipment Method of Payment

Group	Segment	Composite /Element	Element	Description
1 C 200000				Loop Id HL
	HL M 1			HL - Hierarchical Level
			0628 M	Hierarchical ID Number
			0734 C	Hierarchical Parent ID Number
			0735 M	Hierarchical Level Code
	LIN C 1			LIN - Item Identification
			0234 M	Product/Service ID
			0235 M	Product/Service ID Qualifier
	MAN C 9999999			MAN - Marks and Numbers Information
			0087 M	Marks and Numbers
			0088 M	Marks and Numbers Qualifier
	PAL C 1			PAL - Pallet Type and Load Characteristics
			0065 C	Height
			0082 C	Length
			0189 C	Width
			0355 C	Unit or Basis for Measurement Code
			0356 C	Pack
			0883 C	Pallet Type Code
	PO4 C 1			PO4 - Item Physical Details
			0065 C	Height
			0082 C	Length

Group	Segment	Composite /Element	Element	Description
1 C 200000				Loop Id HL
	PO4 C 1			PO4 - Item Physical Details
			0103 C	Packaging Code
			0189 C	Width
			0355 C	Unit or Basis for Measurement Code
			0356 C	Pack
			0384 C	Gross Weight per Pack
	PRF C 1			PRF - Purchase Order Reference
			0324 M	Purchase Order Number
	REF C 9999999			REF - Reference Information
			0127 C	Reference Identification
			0128 M	Reference Identification Qualifier
	SN1 C 1			SN1 - Item Detail (Shipment)
			0355 M	Unit or Basis for Measurement Code
			0382 M	Number of Units Shipped
	TD1 C 20			TD1 - Carrier Details (Quantity and Weight)
			0080 C	Lading Quantity
			0081 C	Weight
			0103 C	Packaging Code
			0183 C	Volume
			0187 C	Weight Qualifier

Group	Segment	Composite /Element	Element	Description
1 C 200000				Loop Id HL
	TD1 C 20			TD1 - Carrier Details (Quantity and Weight)
			0355 C	Unit or Basis for Measurement Code
	TD5 C 12			TD5 - Carrier Details (Routing Sequence/Transit Time)
			0066 C	Identification Code Qualifier
			0067 C	Identification Code
			0091 C	Transportation Method/Type Code
			0133 C	Routing Sequence Code
2 C 12				Loop Id TD3
	TD3 C 1			TD3 - Carrier Details (Equipment)
			0040 C	Equipment Description Code
			0206 C	Equipment Initial
			0207 C	Equipment Number
5 C 200				Loop Id N1
	N1 C 1			N1 - Party Identification
			0066 C	Identification Code Qualifier
			0067 C	Identification Code
			0098 M	Entity Identifier Code
	N2 C 2			N2 - Additional Name Information
			0093 M	Name

Group	Segment	Composite /Element	Element	Description
5 C 200				Loop Id N1
	N3 C 2			N3 - Party Location
			0166 M	Address Information
	N4 C 1			N4 - Geographic Location
			0019 C	City Name
			0026 C	Country Code
			0116 C	Postal Code
			0156 C	State or Province Code

Element Documentation

This section is based on the same structure as the section Elements Used, but here you see all the available descriptions, sequence numbers (in the complete message) for segments and elements (within parentheses). It also includes M3 application documentation and the XPath for the corresponding XML element (XML is one of the technologies that is used for EBM applications), which specifies the position of the element in the message structure. M3 application documentation, as well as the corresponding XPath, can exist on a group, segment, composite and/or element level. Most common is the element level.

M3 application documentation consists of three sections: M3 Application Description, M3 Application Data Translation and M3 Application Specification.

M3 application documentation consists of three sections: M3 Application Description, M3 Application Data Translation and M3 Application Specification.

M3 Application Description
This section provides a general description in “business process language” and describes how the element is used in relation to the M3 logic, for example, which qualifiers are used and which M3 data is used.

M3 Application Data Translation
This section specifies whether or not the data can be translated between M3 and the message. Data translation is used, for example, to translate unit of measure ("STK" to "PCS"), currency codes ("PND" to "GBP") and qualifiers ("BY" to "BU"). Data translations are managed by the M3 program "Business Message Data Translation. Display” (CRS881) and the program “Business Message Data. Translate” (CRS882). The key used in (CRS881) for the element’s data translation is provided.

M3 Application Specifiation
This section contains the specification that constitutes the base for the EBM. It describes whether the element uses data from or transfers data to a M3 API, uses calculated data and/or fixed data. It also describes how and when to make the M3 API calls, which input and output fields to use, etc. Additional information may also be given, such as conditions or notes to clarify specific logic used.

Taken together, the sections M3 Application Description and M3 Application Specification define the functionality of the EBM.
