Published October 2014

M3 Business Engine BODs Rules Overview

Triggering of M3 BE BODs are done via rules in EventAnalytics in the EventHub in the Grid.
For each noun there is one rulepackage containing rules for M3 BE outbound BODs.
The publisher for all M3 BE BODs related events are M3.

Heading	Description
BODNoun	The rule is used for this noun.
BODVerb	The rule is used for this verb
findDIVI	How M3BODProcessor will retirieve Division value from M3 BE
Operator in	The database trigger
Operator out	The operator on outgoing event
Rule	The name of the rule in the rule package. Normaly table and event type.
Table/Pgm	M3 BE table that the rule trigger data from.
Criteria/Filtering	The filtering is if there are specific filtering in the rule. For example if only values abouve a certain status should be sent as a BOD.
IsChanged	Mark on which fields in a table that the rule will trigger on
Fields	The output fields from the event.
